Re: Priority Pollutant Sampling
Perth Amboy City, Middlesex County
NJPDES No. NJ0000221

Dear Mr. Orman:

As discussed in the telephone conversation with Mr. Ken Zinis of your staff on October 21, 1983 you are required by Section 10.3 (a)(9)(ii) of the NJPDES Regulations, and by Federal Regulations, to conduct priority pollutant sampling of your effluent.

In accordance with Appendix B of the NJPDES Regulations, and Table 2C-2 of the EPA Form 2C, you must submit the results of the GC/MS scans specified for your industry category, namely, volatile, acid extractable, base neutral compounds and pesticides. The analyses should be performed on the main process wastewater discharge, 005, and 24 hour composite samples should be used for all pollutants except phenols and cyanide. Please refer to the instructions for EPA Application Form 2C, page 2C-3, Item V-A,B,C, and D for guidance.

The results of the priority pollutant scans should be submitted to the Department no later than 60 days from the date of this letter so that we may expedite issuance of your permit.

If you have any questions regarding the sampling please contact Melisse Wilusz of my staff at (609) 292-4860.

Very truly yours,

Paul C. Kurisko, P.E. Chief
Bureau of Industrial Waste Management
Water Quality Management
